TABLE OF CONTENTS:

- 1 Introduction: A world of regionalisms
- 2 Amalgamation and hysteresis
- 3 The politics of economic cooperation
- 4 The magnetic pull of frontiers
- 5 Mental maps and holistic agendas
- 6 Defragmentation and connectivity
- 7 The frontier as concept and metaphor: Africa in international relations

This book surveys African regionalisms since the turn of the 20th century. It argues that the continent deserves to be considered as a crucible for conceptualizing and contextualizing the ongoing influence of colonial policies, the emergence of specific integration and security cultures, the spread of cross-border regionalisation processes at the expense of region-building, the interplay between territory, space and trans-state networks, and the intrinsic ambivalence of global frontier narratives. This is emphasized through the identification of distinctive 'threads' of regionalism which transcend the binary divide between old and new regionalisms.

Regionalism in Africa

Genealogies, institutions and trans-state networks

Daniel C Bach, Emile Durkheim Centre for Comparative Politics and Sociology, Sciences Po Bordeaux.

Series: Routledge Studies in African Politics and International Relations

This is an indispensable book, thoroughly researched, boldly argued, and written with the clarity, sobriety, and refinement of an aesthete. Daniel Bach is equally adept as storyteller and political investigator or strategy analyst. He charts decades of regionalism in Africa while keeping a perceptive eye on all sorts of foreign influences, and weaves with ease throughout several overlapping and conflicting narratives. -- **Célestin Monga**, *Managing Director, United Nations Industrial Development Organisation (UNIDO)*

This study combines analytical sophistication with superb empirical knowledge of both the history and contemporary practices of regionalism in Africa. It draws together the many different dimensions of regionalism, from the power of colonial legacies and the ambiguous implications of dense cross-border transactions to the importance of club diplomacy and regime survival. It is the most important study of regionalism in Africa to have appeared in past decade. -- **Andrew Hurrell**, *Montague Burton Professor of International Relations, Oxford University*

Daniel Bach has long been one of the most original thinkers on Africa's international relations. This book is particularly timely in exploring sympathetically, yet with a keen analytical perspective, the various strands of African regionalism and how governments are using them to transform their integration in the global economy. -- **John Ravenhill**, *Director, Balsillie School of International Affairs, Waterloo, Canada.*

The book provides a magisterial account of the travails and triumphs of integration from the colonial period to the present. It is a critical addition to studies of regional integration in Africa and informs comparative analysis of regionalism elsewhere. -- **Gilbert M. Khadiagala**, *Jan Smuts Professor of International Relations, The University of the Witwatersrand, Johannesburg, South Africa*
